

Research Report
ICRR Inter-University Research Program 2021

Research Subject: Towards a multiphysics liquid Xe TPC with scintillation and charge multiplication readouts
Principal Investigator: Prof. Konstantinos Nikolopoulos
Participating Researchers: Prof Hiroyuki Sekiya Prof Konstantinos Nikolopoulos Dr Ioannis Katsioulas Dr Patrick Knights Dr Ioannis Manthos
Summary of Research Result : We held virtual meetings once a month to discuss the feedthrough test runs and the construction of the test bench. Because we were unable to travel to Japan from the UK in 2021 due to the COVID19 pandemic, the entire budget for that year was simply carried over.
No.
