

Research Report
ICRR Inter-University Research Program 2020

Research Subject:

Gravitational Wave

Principal Investigator:

Albert Kong (National Tsing Hua University)

Participating Researchers:

K.L. Li (National Cheng Kung University)

Surojit Saha (National Tsing Hua University)

Summary of Research Result :

The main purpose of this research programme is to develop new time-frequency techniques to analyse KAGRA data. Unfortunately, we cannot carry out the project as planned due to following reasons.

- Due to the Covid-19 pandemic, we could not conduct our research as initially planned.
- ICRR Inter-University Research Program's Committee has approved our request to carry over the research budget for the fiscal year 2021.

No.
